

Murdock's Expanded Hydrant Offering

Since 1853, Murdock has manufactured heavy-duty hydrants made from high-quality materials, such as brass, cast iron, steel and bronze. We have expanded our line to include several new hydrants, including: boxed wall, exposed wall, boxed ground, and post and yard styles. Our non-freeze or mild climate hydrants provide year-round sources of water, indoors or outdoors. Murdock hydrants are manufactured from the same high-quality materials we have always used for lasting durability. See our entire product line by visiting our website at www.murdockmfg.com.

When your needs call for the best in hydrants, specify only a genuine Murdock product!

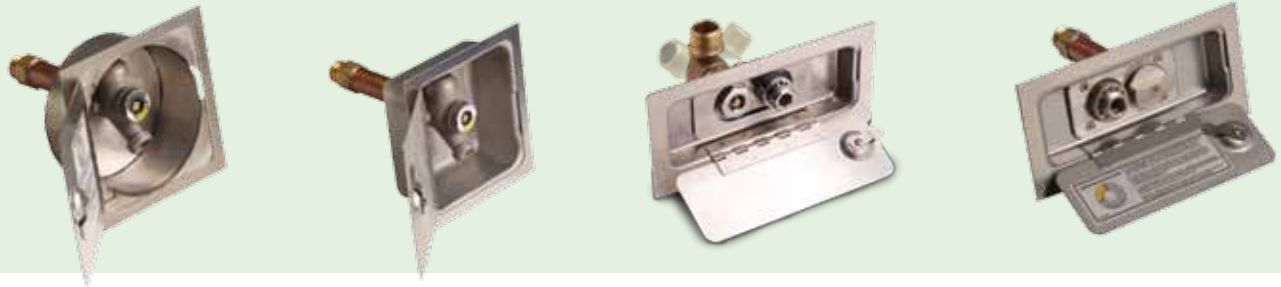

New Hydrants Include:

- Wall Hydrants with Stainless Steel Boxes
- Exposed Wall Hydrants for Freezing and Mild Climates
- Heavy-duty, grade level flush box hydrants
- Sanitary post and yard hydrants
- Roof Hydrants
- Sillcock for mild climates
- Hose Valves
